

Supplementary materials

Table 1. Final version of the clinical practice evaluation quality questionnaire among nursing students.

No.	Question Items	Strongly agree	Agree	Neutral	disagree	Strongly disagree
Quality						
1.	The instructions in the clinical practice evaluation instrument are easy to understand					
2.	The clinical practice evaluation instrument comprehensively covers all clinical activities and focuses on assessing clinical competence					
3.	Each activity/competency/skill has its own evaluation instrument					
4.	The clinical practice evaluation instrument produces consistent scores when used repeatedly					
5.	The clinical practice evaluation instrument aligns with the competencies/skills that have been learned					
6.	The clinical practice evaluation process is conducted ethically and respects my rights and dignity					
7.	The assessment in clinical practice evaluation is based on clear criteria					
Constraints						
8.	The clinical practice evaluation instrument is difficult to access and use					

No.	Question Items	Strongly agree	Agree	Neutral	disagree	Strongly disagree
9.	The clinical practice evaluation instrument is not well stored and/or cannot be accessed again					
10.	Clinical practice evaluation is not conducted with consistent procedures					
11.	During evaluation, the Clinical Instructor (CI)/Academic Supervisor does not immediately fill in/write the scores					
12.	The assessment by the CI/Academic Supervisor is influenced by personal closeness to me					
13.	The assessment by the CI/Academic Supervisor does not cover all the required competencies					
14.	The language used in the clinical practice evaluation instrument is too technical and difficult to understand					
15.	The aspects included in the clinical practice evaluation instrument are too difficult to achieve					
Benefits						
16.	The clinical practice evaluation instrument greatly helps me achieve the best results					
17.	The evaluation aspects are easy to implement without complicated					

No.	Question Items	Strongly agree	Agree	Neutral	disagree	Strongly disagree
	procedures or excessive preparation					
Practicality						
18.	The language and structure of the clinical practice evaluation instrument are well-organised and use standard terminology					
19.	The clinical practice evaluation process is simple and not confusing					
20.	The clinical evaluation instrument and aspects are available in the form of a handbook/e-book/technology and can be studied in advance					
21.	The evaluation aspects are well-presented and clearly readable					
Transparency						
22.	The evaluation process and criteria are clear and accessible to all involved parties					
23.	The assessment results can be viewed in real time					
24.	The clinical practice evaluation instrument and aspects reflect my duties and responsibilities
