Abstract

This first 2018 Issue of the European Journal of Translational Myology presents many novelties, that are demonstrating that the journal is vital and expanding its authorship, readership and relevance from focused fields of biology, physiology, diagnostic, management and rehabilitation of skeletal muscle tissue to the more interesting and clinical relevant fields of human mobility up to those of general medicine. The Editorial Board is consequently expanded to allow fair and expert evaluation of more broadly interests and expertise of the Authors submitting typescripts. We are considering the option to move the name of the journal from Ejtm to Ejt3M (Myology, Mobility, Medicine). Criticisms and suggestions are welcomed.

Key Words: Ejtm, Ejt3M, translational myology, mobility, medicine

Acknowledgments and Funding

This typescript is sponsored by the A&C M-C Foundation for Translational Myology, Padova, Italy.

Conflict of Interest

The author declares to have none conflict of interests.

Ethical Publication Statement

Author confirms that he has read the Journal’s position on issues involved in ethical publication and affirms that this report is consistent with those guidelines.

Corresponding Authors
